August 13, 1986

Dear Mr. Osterweil;

Thank you for your letter, dated July 14, 1986, referred to me by our Personnel Department. In response, I have compiled the following which represents the status of Port Authority surveys, planned or underway, to locate, identify and assess the condition of asbestos-containing materials, if any, at Port Authority facilities at which TWU members are employed:

LaGuardia Airport - Survey scheduled to commence in September 1986.

Kennedy Airport - Survey scheduled to commence in June 1987.

Newark International Airport - Survey scheduled to commence in June 1988.

Heliports - Survey scheduled to commence in June 1989.

George Washington Bridge - Survey completed. Report now being prepared.

Lincoln Tunnel - Survey scheduled to commence in December 1986.

Holland Tunnel - Survey in progress. Tentative completion date is October 1986.

Goethals Bridge - Survey completed. Report now being prepared.

Outerbridge Crossing - Survey completed. Report now being prepared.

World Trade Center Cafeteria - Survey in progress. Tentative completion date is August 29, 1986.

The Port Authority shares your concern about asbestos in the workplace and is making every effort to identify the scope of the problem and to mitigate it promptly.

Sincerely yours,

Wendi F. Weill
